Issued Monday 3:00 PM; April 12, 2021

For the Week Ending April 11, 2021

PROGRESS DESPITE RAIN

Tennessee producers made great progress this week despite previous week conditions and midweek rain events this week. Anhydrous ammonia and burn-down applications were continued when available. Wheat condition remains mostly good and free from frost damage. Fruit producers did note some damage due to recent frosts. Some reports indicate soybean and corn planting has begun as April planted soybeans is growing in practice. Pastures are greening up quickly. Cattle are in good condition. There were 4.5 days suitable for field work. Topsoil moisture was rated 2 percent short, 73 percent adequate, and 25 percent surplus. Subsoil moisture was rated 1 percent short, 72 percent adequate, and 27 percent surplus.
